

# GENERATING SIMPLICITY Real Power to Inspire Confidence

# REAL POWER ...

#### ... In Gastroenterology and Respiratory

The Olympus portfolio of electrosurgical equipment allows physicians to cut, coagulate, and resect with confidence - secure in the knowledge that they are using an established and reliable treatment option.

Because Olympus understands the specific demands of modern electrosurgery, it knows how important it is to have a safe, dedicated energy source to maintain the precision physicians require in their work.

In developing the ESG-300, Olympus has created a product dedicated to the needs of the endoscopist while overcoming the complexity associated with multipurpose generators and focusing on providing a simple, safe, and smart source of energy.

#### ... Meets Your Needs

The flexibility of simple operating modes for all key electrosurgical procedures coupled with enhanced confidence for users familiar with other systems.

Whether performing a routine polypectomy or a more complex procedure (like an ESD), the ESG-300 can adapt to meet all electrosurgical needs.

### ... Dedicated to You

The convenience to simply save several diathermy settings allows users to work with greater confidence and safety, saving time otherwise spent on manual selection.

# REAL POWER ...

## ... At the Simple Touch of a Button

A simple, intuitive touch-screen interface means users can easily set up the system to meet their personal needs in just a few steps.

## ... With No Strings Attached

The operational freedom provided by the wireless foot switch allows safer placement in the theatre.

Simple, hands-free toggling of procedure settings – without the need to directly interact with the generator – means a more efficient user workflow.

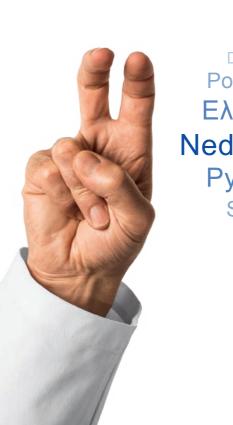

## ... Offers You Guidance

The smart assistance messaging system provides simple and easily understandable feedback that empowers users to confidently operate the ESG-300.

## ... Talks Your Language

A choice of 29 display languages means users can understand and operate the system with ease, reducing the likelihood of any confusion.

#### ... Just Got Smart

The Argon Plasma Unit (APU-300) can be used in combination with the ESG-300 to provide advanced, superficial hemostasis.

The SmartArgon Mode – where the coagulation margin is independent of the distance between probe and tissue – supports consistent and safe hemostasis with reduced carbonization. Furthermore, the ability to limit the penetration depth of the plasma beam makes SmartArgon the perfect option for fragile tissue structures.

Depending on the target tissue, a choice of probes are available – lateral, axial, and radial – to allow for precise, selective coagulation.

#### ... Built On Experience

**Fast Spark Monitor** – measures spark intensity during cutting procedures, automatically adjusting power output to achieve reproducible tissue effects and enhanced protection of EndoTherapy instruments.

**High-Power Cut Support** – immediate spark ignition enables cutting without initial delays, which means superior cutting performance.

**Contact Quality Monitor** – analyzes contact resistance of the neutral electrode, reducing the risk of thermal injuries to the patient.

Leakage-Protection Sensor – measures and controls leakage current, reducing the risk of unintended harm to the patient or user.

# MONOPOLAR HF MODES

Cut Modes	Coagulation Modes
PureCut	SoftCoag
Continuous cutting mode with low coagulation effect	Slow and deep coagulation – optimal for coag
PulseCut Slow/Fast	SprayCoag
Intermittent cutting mode which is commonly used	Contact-free coagulation – optimal for POEM p
for various endoscopic procedures	ForcedCoag
BlendCut	Fast and effective coagulation
Continuous cutting mode with increased coagulation	PowerCoag
effect – ideal for dissection	Fast and effective coagulation with increased of

# ARGON PLASMA MODES

# ADVANCED WORKFLOW AND USABILITY

## ForcedArgon

Continuous argon plasma beam with steady power output for fast and effective large area hemostasis and ablation

## **PulsedArgon Slow/Fast**

Pulsed argon plasma beam with intermittent power output for a more controlled effect on tissue

## SmartArgon

Detects distance to tissue and adjusts power automatically – especially suitable for fragile tissue structures such as the small bowel

#### **Ordering Information**

HF System Components						
Order No.	Article	Description				
WA90003W	ESG-300	Electrosurgical generator				
WA90004W	APU-300	Argon plasma unit				
WA94034W	Wireless foot switch	Including receiver and charger				
WA94033C	Wired foot switch	4 m cable				
K10026806	TC-E300 (EU)	System cart, for most European countries				
K10026805	TC-E300 (UK)	System cart, UK standard				
A02915A	MAJ-860	Active cord for ET instruments, 8 mm				
WA99510A	NE cable	Connecting cable for disposable neutral electrode, 4.5 m				
E0427245	MAJ-897	Split neutral electrode, disposable, 10 pcs				
WA94041A	Pressure reducer	DIN 477-6, central and southern Europe				
WA94042A	Pressure reducer	DIN 477-10, northern Europe				
WA94043A Pressure reducer CGA no. 580, Italy		CGA no. 580, Italy				
WA95621A	Power cable	4.5 m, with angled plug – many European countries, type E/F – EU				
WA95623A	Power cable	4.5 m, with angled plug – United Kingdom and other countries, type E/F – UK
